

Suhani Paliwal

Profile: Full Stack Web Developer | Python Backend Developer

Contact: paliwalsuhani842@gmail.com | +91 89896 16898 | linkedin.com/in/suhani-paliwal-160655245 | github.com/suhanipaliwal8

PROFESSIONAL SUMMARY

Motivated Full Stack Web Developer with a strong foundation in Python backend development, backend architecture, and modern web technologies. Skilled in building RESTful APIs with FastAPI and Django, designing scalable backend systems, working with relational databases, and implementing authentication and authorization mechanisms. Passionate about writing clean, maintainable code and continuously learning software architecture, backend design patterns, and frontend development.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML5, CSS3, SQL

Backend: FastAPI, Django, Django REST Framework, REST APIs, JWT, OAuth2, Pydantic

Backend Architecture(learning): MVC, Layered Architecture, Clean Architecture, Monolithic Architecture, Microservices Basics, API Design, Scalability, Separation of Concerns, Dependency Injection, Caching Basics

Frontend(Basics): HTML, CSS, JavaScript (ES6+)

Databases: PostgreSQL, MySQL, SQLite

Tools: Git, GitHub, VS Code, Postman, Uvicorn

Concepts: OOP, SOLID Principles, Authentication, Authorization, Exception Handling, Request Validation, Middleware, Session Management

PROJECTS

NiraamaPath Tri-Module Digital Health Platform

Tech Stack: FastAPI, HTML, CSS, JavaScript, JSON

- Built a full stack health platform prototype for urban users (Urbancure) and rural users (SwasthyaSetu).
- Developed backend APIs using FastAPI to support health-related workflows and structured data handling.
- Designed a website prototype focused on accessibility, usability, and a clean user experience for both urban and rural usage.

Todo Management API

Tech Stack: FastAPI, Pydantic

- Developed CRUD APIs with filtering and query parameter support.
- Added request validation and followed REST best practices.

Production-Grade Personal Portfolio Platform (Ongoing)

Tech Stack: Python, FastAPI, React, Vite, PostgreSQL, SQLAlchemy 2.x (Async), Alembic, JWT Authentication, REST API, Git

- Developing a production-ready full-stack portfolio platform with a React frontend and FastAPI backend following Clean Architecture principles.
- Implemented secure JWT-based admin authentication, asynchronous REST APIs, and a normalized PostgreSQL database for managing projects, skills, blogs, experience, education, certificates, resumes, and profile information.

- Built a scalable backend using SQLAlchemy 2.x Async ORM, Alembic migrations, repository-service architecture, centralized exception handling, request validation, structured logging, CORS configuration, and security middleware.
- Designing the application to support future scalability while providing a secure, database-driven content management system for a personal portfolio.

Authentication API

Tech Stack: FastAPI, PostgreSQL, SQLAlchemy, JWT, Argon2, Alembic

- Built a RESTful authentication API with user registration, login, and JWT-based authentication.
 - Implemented secure Argon2 password hashing, JWT validation middleware, and protected user endpoints.
 - Added asynchronous PostgreSQL integration with SQLAlchemy, Alembic migrations, request logging, and database health checks.
-

EDUCATION

B.Tech. – CSE(Data Science)

Rajiv Gandhi Proudtyogik Vishwavidyalaya
2025 - 2029

CERTIFICATIONS

- Python Programming
 - Django Development
 - FastAPI Development
 - Git & GitHub
 - SQL Fundamentals
-

SOFT SKILLS

Problem Solving, Communication, Team Collaboration, Adaptability, Continuous Learning

LANGUAGES

English, Hindi

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
